Day 2 => Unchecked and Checked Exception =>

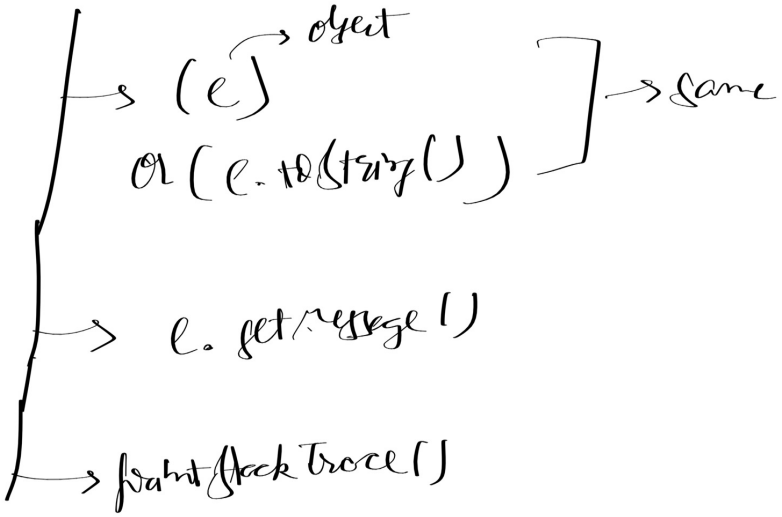

Note => Built in Exception

- Check Exception
  - compile time exception
- Unchecked exception
  - run time exception

↳ in this programmer has to handle the exception or else program will not get compiled

↳ not force by compiler to catch the exception
↳ but if exception come then program crash at time of run time.

Exception object memory

```
method1(){
    ==========
}
```

```
main(){
    method2();
}
```

```
method2(){
    method1();
}
```

↳ printStackTrace() → is use to trace the exception
